Beyond typical Alexa

Your secure community concierge.

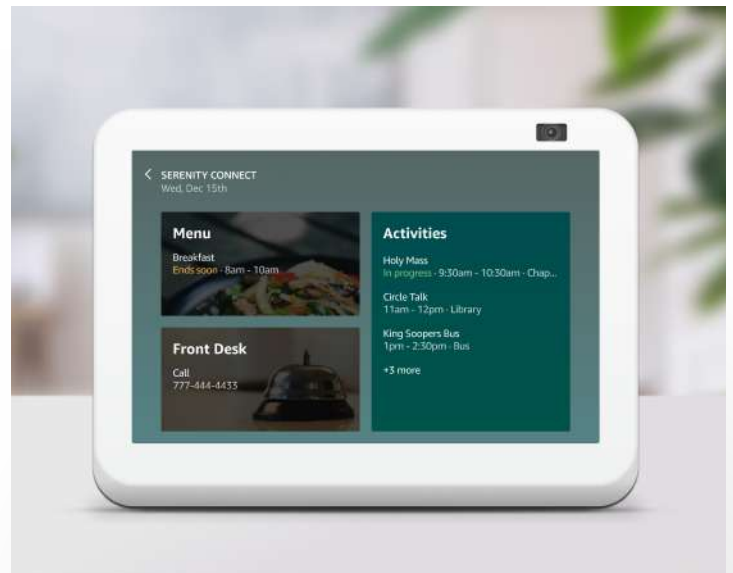

Unlike an off-the-shelf Alexa device, ours are deployed in a secure, closed network using Serenity's software. This gives you control of the content on the devices, and provides your residents with greater independence, social engagement, and connectedness.

Phone and video calls can only be made via private approved address books. And no drop-ins!

- Receive community announcements & updates
- Ask Alexa:
 - “What’s for dinner?”
 - “What are Sunday’s activities?”
 - “Call my daughter.”
 - “Play country music.”
 - “Set timer for 20 minutes.”
- Set reminders for activities, medications, and more
- Make and receive secure video calls with family, friends, & staff
- Telehealth visits

 ALEXA SAYS:

“Serenity can help with that....”

HIPAA
COMPLIANT

Concerned about privacy? Serenity and Alexa Smart Properties have built multiple layers of privacy protection with resident and community privacy in mind. No personal information is shared with Alexa.
